

高频面试题之CSS3-flex布局常见面试题

如何实现内容宽度等分

```
//html
<div class="box">
   <div style="background: red;">html5</div>
   <div style="background: yellow;">css3</div>
   <div style="background: blue;">js</div>
               C1855.18
</div>
//css
.box {
                                     toclass, allua
   display: flex
.box div
```

左右布局,一侧定宽,另一

```
//html
<div class="box">
   <div class="left">html5</div>
   <div class="right">css3</div>
</div>
//css
.box {
 display: flex;
}
.box .left {
  width: 300px;
  background: red;
}
.box .right {
                                                  小滴课堂:xdclass.net
```

讲师微信:xdclass-anna

```
flex: 1;
background: yellow;
}
```

ntml5 css3
